How to access your Courseware (via SSO):

1. Access Canvas.

2. Navigate to your course, then click on your course materials. The text appearing on this button will vary.

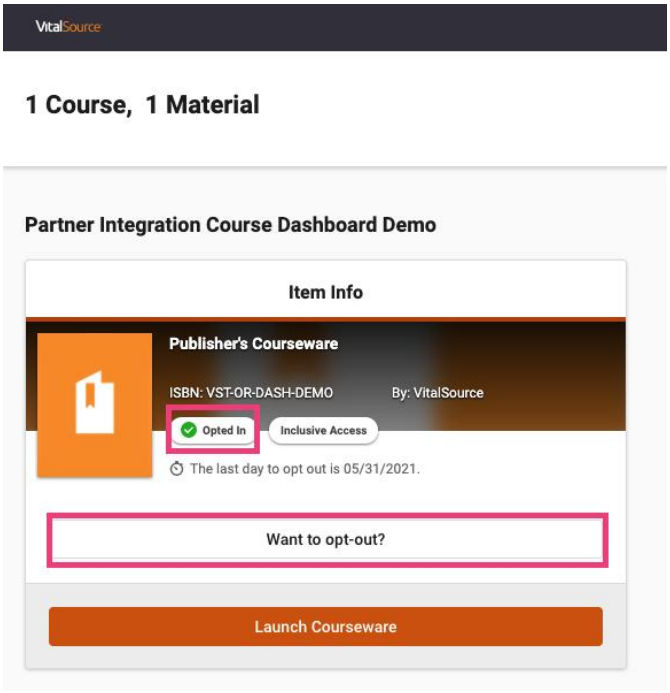

3. Click on the Load Course Materials Dashboard button. The text appearing here will vary, too.

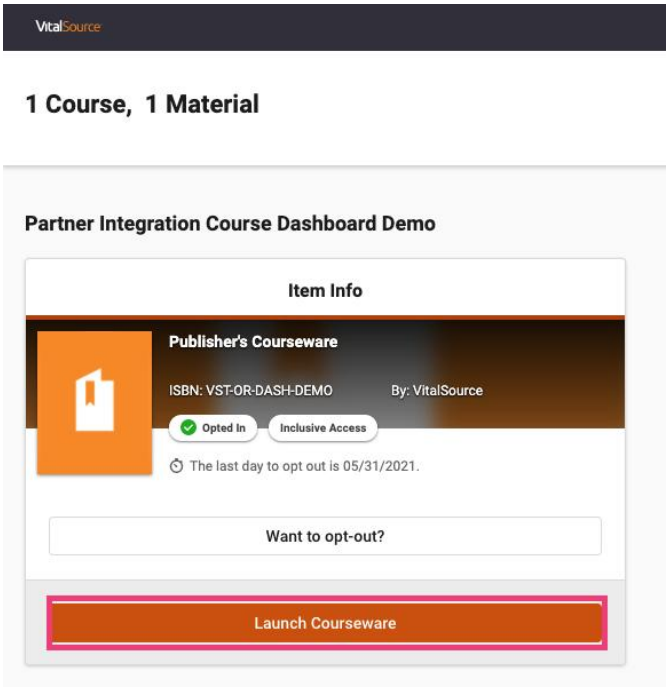

Your current opt-in decision will appear in a bubble in the middle of the courseware card. You have until the date listed on the card to "opt-out."

1. To opt-out, click on the "**Want to opt-out?"** button. You will be prompted to answer why you've opted out.

2. Once opted-out, you will have the option to opt back in until the date listed on the card. Once the opt-out period has ended, a **Buy Now** button will appear. Click the button to purchase the courseware from your bookstore outside of the DDA program.

Click on the **Launch Courseware** button to access your courseware.

Have an access code? (most courses do not require this) When you click/tap "Reveal Access Code," the drawer comes out from the right with the information about the code, instructions, and publisher URL.
